DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-19, drawn to a drilling apparatus allowing tilting or lateral movement of first and second members.

Group II, claim(s) 20, drawn to a simulating apparatus.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I does not require the rotation member feature of Group II.

3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species 1- Figures 2-11, a resilient deformable connection for a drill bit;

Art Unit: 3625

Species 2- Figures 12A-12D and 13, a resilient deformable connection for a drill string;

Species 3- Figures 14-20E, a resilient deformable connection for a cutter mounted to a
drill bit body.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

4. The claims are deemed to correspond to the species listed above in the following manner:

Species 1- Claims 2, 3, 5, 10-12

Species 2- Claims 18 and 19

Species 3- claims 15 and 16

The following claim(s) are generic: 1 (all species)

4, 6, 7, 13, 14, 17 (species 1 and 2)

8, 9 (species 1 and 3)

5. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Species 2 does not require the elastomeric spacer for Species 1 and 3, while Species 3 does not require the transfer member of Species 1 or 2.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Any inquiries concerning this communication or earlier communications from the examiner should be directed to David Bagnell, whose phone number is (703) 308-2151. The examiner can normally be reached on Mon.-Fri. from 6:30 AM to 3:00 PM.

If attempts to reach the examiner are unsuccessful, the examiner's supervisor, Tamara Graysay can be reached on (703) 308-2144. The fax number for this group is (703) 305-3597.
